

HOW WE USE FOSS TO REDUCE COST AND INCREASE PRIVACY

/ nammahari

- FOSS & Privacy Enthusiasts
- Building Mahathaan & FOSS United
- A huge fan of FOSS, Self Hosting, Digital Minimalism, art and etc.
- hari@fossunited.org / hari@mahathaan.com

FOSS Used In Org.

- Mattermost (Communication)
- Coolify (Web Hosting)
- Nextcloud (Storage)
- Umami (Analytics)
- Plane.so / Mattermost (Project Management)
- Vaultwarden (Passwords)
- ERPNext (CRM)
- Jitsi / Element Call (Video Conference)
- Figuring out Penpot for Design
- Head Over to fossunited.org/stack

How Much We Spend

- A good to setup self-hosted service in service; ps: docker make these easy too.
- Server cost for Mahathaan comes around \$500 Annually.

How Much We Save

- Replacing Slack, Dropbox, and Jira alone could save \$2,000 to \$3,000 annually.
- With additional tools like analytics, password management, and video conferencing, total annual savings could reach \$5,000 to \$7,000.

Also FOSS make sure to give the ownership
/ freedom and of course the all mighty
Privacy

There are a lot to speak about FOSS : in Education,
Engineering, Startups, Individuals and much more

Introduction FOSS Express Tamil Nadu.

An Initiative by FOSS United to Increase FOSS Literacy
